

Route description/tour characteristics:

This tour offers the shortest possibility to ride a 2000m pass from Sonthofen.

"Highlight" certainly also scenically is the Silvretta high alpine road with the Bielerhöhe 2035 m.

The tour starts in Sonthofen and leads first towards Blaichach to Bielerdorf. Turn left there and after about 200 m turn right again towards Hüttenberg. From here continue to Ofterschwang and Bolsterlang. Here turn right in the direction of the "Dorflift". Via Sonderdorf you reach the road up to the Riedbergpass (1420 m). From there via Balderschwang to Hittisau and Lingenau. Turn left here and via Egg to Schwarzenberg. There turn left to Andelsbuch-Bersbuch. Turn right onto the L 200 and then via Reuthe and Bizau to Schnepfegg (903 m). Here the Gasthof Kanisfluh offers a good place to stop for refreshments.

The tour continues to Au and from there (turn right) up to Damüls and the Faschinajoch (1514 m). From there it goes via Thüringerberg to Bludenz. About 4 km after Bludenz, in St. Anton im Montafon, the tour turns left towards Bartholomaeberg. The route is very nice to ride and offers delightful views down into the valley. Then on to Silbertal and finally back into the valley to Schruns.

Then turn left, the Silvretta-Hochalpenstraße (toll road) begins behind Partenen. The route leads steeply uphill with many bends and turns and offers, the higher you get, a spectacular high mountain landscape. Up to the Bielerhöhe (2032m). At the end of the toll road you should not miss the detour to the Kopsstausee and Zeinissee! Back on the main route, the route continues via Galtür and Ischgl to Landeck. From here continue to Imst. There it goes up to the Hahntennjoch (1909 m).

Always nice to drive this track! Arrived in the Lechtal, turn right to Weißenbach and then over the Gaichtpass (1093 m) into the Tannheimer Tal and over the Oberjochpass (1178 m) back to Sonthofen.

Distance (with a detour to the Kops reservoir): 315 km
