

short tour description/route characteristics: The Black Forest is an ideal motorcycle area! The descents into the valley and the ascents to the heights offer endless fun in the curves. Predominantly little traffic you can let your heart (and your gas hand) run free. The tour leads first on small roads to Hornberg and via Langenschiltach to St. Georgen. Further on via Furtwangen, the tour goes steeply downhill over wonderful curve combinations. Shortly before the bottom of the valley a small road branches off to the left. Via Wildgutach and Glashütte the path reaches the upper Glottertal. There it turns left and continues to Neustadt.

Via Lenzkirch, past the Schluchsee and Menzenschwand, the route takes you again into a wild hunt for bends towards Todtnau. But already the next high light follows: The way to the Münstertal. A well-maintained road leads uphill and then downhill again just as spectacularly. A few kilometres further on, a small road leads up towards Schauinsland.

Via Hofsgrund and Kirchzarten the route goes back up to Glottertal. In St. Märgen turn left and continue to enjoy the Black Forest roads. Finally the dream road up to the Kand-el (beautiful viewpoint). Down into the valley, the route leads via Elzach to Oberprechtal. Here follows another delicacy: The road to Gutach (best to turn around afterwards and do it all over again!). Passing the open-air museum "Vogtbauernhof" (very worth seeing) we return to Kirnbach and the starting point of the tour.
